Simple Ways to Prevent Poisoning from Plants

DO NOT

- Assume a plant is not poisonous because birds or other wildlife can eat it
- Use any part of a plant for cooking or medicinal use unless fully aware of its attributes

DO

- Make sure ALL plants, both indoor and outdoor are accurately identified
- Teach your children never to put leaves, stems, seeds, nuts or berries from any plant into their mouths
- Keep poisonous plants out of children's reach, eg. remove or securely fence off all identified poisonous plants
- Keep a record of ALL plants in your garden
- Take a sample of a plant to your local nursery if unsure what the name of the plant is
- Keep the Poisons Information Centre Phone Number next to your phone 13 11 26
